Extent of Change (attachments, if necessary):
All parts listed above will be changed from ink marking to laser marking. Please refer to the attached photos of samples.

Reasons For Change:
This change is being made to increase production capacity and improve customer deliveries. In the line of zero defects, the conversion to laser marking will present better process and quality controls within manufacturing. The SOT-323 and SOT-363 Surface Mount RF/µW Schottky and PIN Diodes are already being laser marked. This change together with the future conversion of SOT-23 and 143 PIN diodes and other products to laser mark will further standardize the whole line of Hewlett-Packard Surface Mount products.

Effective Date of Change:
Products will be laser marked starting February 1st, 1999. Until inventories of the existing products with ink marking are depleted, customers may receive products with either types of mark.
