**Optocoupler Option 020**

for 5000 V rms/1 Minute Requirement

**Data Sheet**

**OPTION 020**

**Description**

Option 020 consists of special construction on a wide range of Avago plastic optocouplers. After assembly, each unit is subjected to an equivalent electrical performance test to ensure its capability to withstand 5000 V rms input to output for one minute. This test is recognized by Underwriters Laboratory as proof that these components may be used in many high voltage applications.

**Features**

- Special Construction and Testing
- UL Recognition for 5000 V rms/1 Minute Requirement (File No. E55361)

**Applications**

Dielectric withstand voltage ratings are required by Underwriters Laboratory when components are used in certain types of electronic equipment. The voltage rating depends on the type of electronic equipment and the specific application within the equipment. The 5000 Vrms/1 Minute dielectric withstand voltage rating provided by Option 020 offers excellent high voltage input to output protection. Some applicable UL documents are listed below.
