LSI® SAS 9300-16i PCI Express® to 12Gb/s Serial Attached SCSI (SAS) Host Bus Adapter User Guide

1   Overview

The LSI® PCI Express® (PCIe®)-to-Serial Attached SCSI (SAS) host bus adapter (HBA), referred to as the LSI 12Gb/s SAS HBA, provides high-performance internal storage connectivity for servers and workstations. The LSI 12Gb/s SAS HBA provides sixteen lanes of 12Gb/s SAS connectivity and is matched with eight lanes of PCIe 3.0 8Gb/s performance. The LSI 12Gb/s SAS HBA is based on the Fusion-MPT™-architected LSI SAS 3008 controller that integrates the latest enhancements in PCIe 3.0 technology and 12Gb/s SAS technology.

2   Features

This section lists the LSI 12Gb/s SAS HBA features.

- Implements two LSI SAS 3008 eight-port 12Gb/s SAS to PCIe 3.0 controllers
- Supports eight-lane, full-duplex PCIe 3.0 performance
- Supports sixteen internal 12Gb/s SATA+SAS ports
- Supports SATA link rates of 3Gb/s and 6Gb/s
- Supports SAS link rates of 3Gb/s, 6Gb/s, and 12Gb/s
- Provides four x4 internal mini-SAS HD connectors (SFF-8643)
- Supports passive copper cable
- Supports up to 1024 SATA or SAS end devices
- Offered with a full-height bracket
- Provides two heartbeat LEDs

3   Functional Descriptions

3.1   PCI Express Interface

The LSI SAS 9300-16i HBA uses two LSI SAS 3008 controller chips and one PCI Express switch to provide high-bandwidth interconnection ability. PCIe is a high-speed standard local bus for point-to-point interfacing of I/O components to the processor and the memory subsystems in high-end computers and servers.

The LSI 12Gb/s SAS HBA supports eight-lane PCIe performance up to 64Gb/s single direction and 128Gb/s dual direction.

3.2   SAS-3 Interface

The LSI SAS 3008 controller chip contains the SATA+SAS functionality for the LSI 12Gb/s SAS HBA. The following table shows the LSI SAS 12Gb/s SAS performance.

Half Duplex	Full Duplex
Narrow port (one lane), 1200 MB/s	Narrow port (one lane), 2400 MB/s
Wide port (four lanes), 4800 MB/s	Wide port (four lanes), 9600 MB/s

3.3 LED Management

The LSI 12Gb/s SAS HBA offers LED management support for your backplane implementation. This configuration option lets you use the LSI 12Gb/s SAS HBA with backplanes configured for the SGPIO interface. The LSI 12Gb/s SAS HBA is in accordance with *SFF-8485: Specification for Serial GPIO (SGPIO) Bus, Revision 0.7*.

4 Operating System Support

The LSI 12Gb/s SAS HBA supports all major operating systems: Windows®, Linux® Red Hat®, Linux SUSE® Enterprise Server (SLES), Solaris®, and VMware®. Refer to http://go.lsi.com/hbas for details on the software versions and device driver support. For Solaris support, contact the LSI Technical Support team.

> **NOTE** The LSI 12Gb/s SAS HBA also supports the Solaris 10 Update 11 and Solaris 11 Update 1 operating systems. Oracle® provides a built-in driver, LSI does not provide an additional LSI driver installation for Solaris operating systems. For more information on the Oracle Solaris driver and installation, sign in at the following Oracle link.
> https://support.oracle.com/
> Contact Oracle support for Oracle driver or software support.

5 LSI SAS 9300-16i HBA Characteristics

5.1 Memory

The LSI 12Gb/s SAS HBA provides two 4-M $\times$ 16-bit Flash ROMs to store the firmware and the BIOS.

5.2 LED

The LSI 12Gb/s SAS HBA Heartbeat LEDs, LED1 and LED2, blink green to indicate the HBA is capable of general activity.

5.3 Connectors

PCIe Connector (J12). The LSI 12Gb/s SAS HBA supports a x8 interface. The PCIe host interface connection is through the edge connector, J12, which provides connections on both the top (J12 B) and bottom (J12 A) of the board. The signal definitions and pin numbers conform to the PCIe specification.

SATA+SAS Connector (J7). The LSI 12Gb/s SAS HBA supports SATA and SAS connectors through connectors that are SFF-8643 mini-SAS HD, internal connectors.

Auxiliary Power Connector (J10). The LSI 12Gb/s SAS HBA provides a 6-pin PCIe power connector.

5.4   Physical Characteristics

The LSI 12Gb/s SAS HBA is a 6.1-in. × 4.4-in board. The component height on the top and bottom of the LSI 12Gb/s SAS HBA is in accordance with the PCIe specification. The following figure shows the HBA board layout.

Figure 1 LSI SAS 9300-16i HBA Board Layout
- **J12** – PCIe x8 board edge connector
- **LED1, LED2** – Heartbeat LEDs
- **J10** – Auxiliary power connector
- **J7** – SFF-8643 mini-SAS HD, internal, right-angle connector

5.5   Electrical Characteristics

The power requirements for the LSI SAS 9300-16i HBA under normal operation are as follows:

- PCIe 12.0 V = 2.25 A
- Passive cable, nominal = 26.9 W

5.6   Thermal and Atmospheric Limits

The atmospheric limits for the LSI 12Gb/s SAS HBA are as follows:

- Temperature range: 0 °C to 55 °C (32 °F to 131 °F) (dry bulb)
- Relative humidity range: 5% to 90% noncondensing
- Maximum dew point temperature: 32 °C (89.6 °F)
- Minimum airflow: 200 linear feet per minute at 55 °C inlet temperature

The following limits define the storage and transit environment for the LSI 12Gb/s SAS HBA:

- Temperature range: –45 °C to +105 °C (–49 °F to +221 °F) (dry bulb)
- Relative humidity range: 5% to 90% noncondensing

6   LSI 12Gb/s SAS HBA Certifications and Safety Characteristics

All LSI 12Gb/s SAS HBAs meet or exceed the requirements of UL flammability rating 94V-0. Each bare board is marked with the supplier's name or trademark, type, and UL flammability rating. Because these boards are installed in a PCIe bus slot, all voltages are less than the SELV 42.4-V limit.

The design and implementation of the LSI 12Gb/s SAS HBA minimizes electromagnetic emissions, susceptibility to radio frequency energy, and the effects of electrostatic discharge.

The LSI 12Gb/s SAS HBA meets the following integrated electromagnetic interference (EMI) compliance labels:

- CE mark
- CISPR Class B
- C-Tick mark
- Canadian Compliance Statement
- FCC Class B, marked with the FCC Self-Certification logo
- Japan VCCI
- Korean KCC
- Taiwan BSMI

The LSI 12Gb/s SAS HBA meets the following environmental directives:

- RoHS
- WEEE

7   Hardware Detailed Installation Instructions

To install the LSI 12Gb/s SAS HBA, follow these steps:

1. **Unpack the HBA, and inspect it for damage.** Unpack the HBA in a static-free environment. Remove the HBA from the antistatic bag, and carefully inspect the device for damage. If you notice any damage, contact LSI or your reseller support representative.

   ATTENTION   To avoid the risk of data loss, make a backup of your data before changing your system configuration.

2. **Prepare the computer.** Turn off the computer, and disconnect the power cord from the rear of the power supply.

   CAUTION   Disconnect the computer from the power supply and from any networks to which you will install the HBA, or you risk damaging the system or experiencing electrical shock.

3. **Remove the cover from the chassis.**

4. **Insert the HBA into an available PCIe slot.** Locate an empty x8 PCIe slot. Remove the blank bracket panel on the rear of the computer that aligns with the empty PCIe slot. Save this bracket screw, if applicable. Align the HBA to a PCIe slot. Press down gently, but firmly, to seat the HBA correctly in the slot. The following figure shows how to insert the HBA into a PCIe slot.

Figure 2 Install an LSI 12Gb/s x8 HBA in a PCIe Slot
NOTE   The shape, size, and locations of the components on your HBA and its
                bracket might vary from this illustration. The HBA requires a x8
                PCIe slot.

5. **Secure the HBA bracket to the system's chassis.** Install the bracket screw, if applicable, or engage the system retention mechanism to secure the HBA to the system's chassis.

6. **Connect the auxiliary power cable to the LSI SAS 12Gb/s SAS HBA if auxiliary power is required with your system design.**

7. **Connect SAS cables between the HBA and the SAS backplane or any other SATA or SAS device.** The LSI 12Gb/s SAS HBA has four SFF-8643, internal x4, mini-SAS HD connectors. Use cables with an internal mini-SAS HD connector on one end (to connect to the HBA) and the appropriate connector on the other end to attach to the backplane or SAS/SATA devices.

8. **Replace the cover and any power cords, and power up the system.** Replace the chassis's cover, reconnect any power cords, and reconnect any network cables. Turn on the power.

The hardware installation of your LSI 12Gb/s SAS HBA is complete.

8   Technical Support

For assistance installing, configuring, or running the LSI 12Gb/s SAS HBA, contact LSI Technical Support:
