

BCM88020

SCALABLE SWITCHING—24-GBPS ETHERNET SWITCH PACKET PROCESSOR

FEATURES

• Deterministic, programmable architecture

- Wirespeed performance
- BroadSide line-rate processor
- Coprocessors accelerate common functions

Advanced network forwarding

- IEEE 802.1ad Provider Bridging (Q-in-Q)
- IEEE 802.1ah Provider Backbone Bridging (MAC-in-MAC)
- · IPv4 and IPv6 unicast and multicast routing
- MPLS and VPLS forwarding
- Tunneling

Scalable forwarding

- · Off-chip tables, meters, and counters
- Distributed ingress and egress processing
- Logical interfaces

Robust embedded network monitoring and protection

- · IEEE, ITU, and IETF Ethernet and MPLS OAM
- Protection switches for 50-ms service recovery
- · Port and flow mirroring
- Fine-grained, 64-bit traffic counters

· Security and QoS policy enforcement

- Integrated RangeFinder classification engine enforces wirespeed ACLs
- IETF and metro Ethernet forum policers
- BroadSAFETM DoS filters

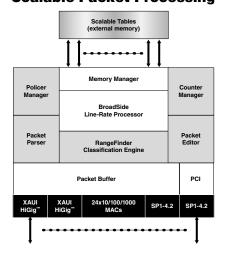

FEATURES (CONT.)

- Versatile, backplane-capable standard interfaces
 - Two integrated 10-GbE MACs with HiGig+TM support
 - 24 integrated 10/100/1000M MACs
 - Multichannel SPI-4.2 interfaces
- Flexible on-chip, shared memory packet buffer
 - Jumbo frames
 - Any-to-any connectivity
 - Lossless backpressure or priority tail drop
 - · Processor bypass

SUMMARY OF BENEFITS

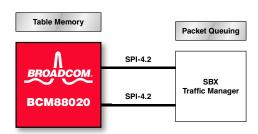

- Exceptional network scalability
- Programmable architecture adapts to changing network requirements
- Complete application solution minimizes time-to-market and decreases risk
- Unique processor architecture runs concurrent services at wirespeed
- Fast path OAM scales service monitoring
- Integrated ACLs eliminate cost and power of external network search engines or TCAMs

Scalable Packet Processing

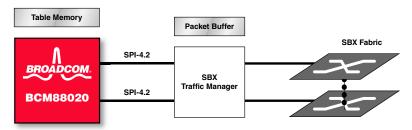

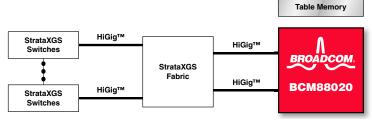

OVERVIEW

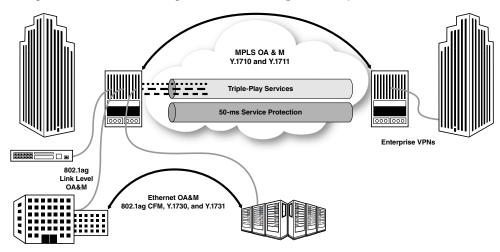

Highly Integrated Fixed Configuration Carrier Ethernet System

SBX Fabric Scales Architecture to Modular Chassis Systems

Expand StrataXGS® Systems with High-Value, Scalable Services

Build Converged Ethernet Networks with BCM88020-Powered Systems
