

Specific Program Documentation

These terms (in addition to those in your CA Order Form), apply to the CA software listed below ("CA Software"), from the effective date of your CA Order Form.

Program Name: Service Virtualization Functional Transactions (formerly Broadcom DevTest Runtime User)

Licensing Model

Service Virtualization Functional Transactions is licensed by the number of Transactions Per Month and Packs. Service Virtualization Functional Transactions requires a license to Service Virtualization Concurrent Users.

"Transactions" means any API call made to an active virtual service. A virtual service is a service, deployed, run, or managed within a virtual service environment ("VSE") server. An active virtual service means a virtual service that is running in a Service Virtualization VSE: either a VSE connected to a registry or a BlazeMeter VSE.

We recommend standing up a single Enterprise Dashboard across your Enterprise. If running multiple unique environments by having multiple Enterprise Dashboard or using BlazeMeter virtual service environment (VSE), the total Transactions Per Month will be sum of each environments' Transactions.

"Transactions Per Month" means Transactions per 30 calendar days.

"Pack" means 23,000 Transactions per month.

Third Party Terms

Any required third-party software license terms are incorporated by this reference and are set forth in the online documentation for the CA software.
