Statement on Regulation (EU) No 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants (POPs Regulation)

Persistent organic pollutants (POPs) are organic substances that persist in the environment, accumulate in living organisms and pose a risk to our health and the environment. They can be transported by air, water or migratory species across international borders, reaching regions where they have never been produced or used. POPs are regulated worldwide by the Stockholm Convention and the Aarhus Protocol. These pieces of legislation are implemented in the European Union by the POPs Regulation (EC) No 850/2004, which was recast into Regulation (EU) 2019/1021 of European Parliament and of the council in 2019.

Broadcom has been aware of the responsibilities for protecting the environment and human health. We have always kept on tracking the update of prohibited substances and restricted substances listed in the POPs Regulation and verify the presence of any substance in our products. Based on the information we verified, we announce, to our best knowledge, our products are complying with the POPs Regulation and do not contain substances subject to prohibitions listed in the annexes to Regulation (EU) 2019/1021 and amendments. **EU Commission Delegated Regulation 2020/784 amending Annex I to Regulation (EU) 2019/1021 as regards the listing of perfluorooctanoic acid (PFOA).** We continue to follow up the update of the POPs regulation and ensure the conformity of our products.

Please send your enquiry to our designated email (rohs.enquiry-spg@broadcom.com) if you would like to seek further clarification.

Thank You.
