KEY OUTCOMES

- Deliver high-value, high-quality products and services that your customers want
- Make critical decisions quickly to avoid common failure patterns in large enterprise agile adoptions
- Achieve the performance, visibility and predictability to make more- informed decisions
- Adapt to change and more effectively navigate fiercely competitive markets

KEY SERVICES FEATURES

- Align strategy and development
- Adopt agile methods at the team level, in context with your real work and unique environment
- Scale agile practices successfully to the program level
- Reallocate resources to maximize portfolio growth

Business Challenges

The practices and techniques of lightweight, agile methodologies are relatively simple, yet they can be difficult to master and adopt for individuals, teams, programs and whole businesses. Once you've created a cross-functional team and taught them the basics, are they agile experts? How long will they slow down to speed up while trying to get the hang of new techniques?

Offering Overview

Accelerate the positive results of agile methods with coaching and consulting. We'll facilitate, mentor and guide you through the processes needed to build, expand and transform your organization. CA Agile Consultants support your teams at key moments to help them through agile ceremonies, answer perplexing questions about applying agile techniques in your unique environment and model the servant leadership and agile mindset that will propel the team to excellence.

Teams learn how to deliver high-value, running, tested features in short increments while providing the performance, visibility and predictability that helps leadership steer based on results.

Get expert advice as you perform real work. Either at your location or remotely, our consultants can coach and facilitate your teams, programs, PMO or other group. Companies engage us to:
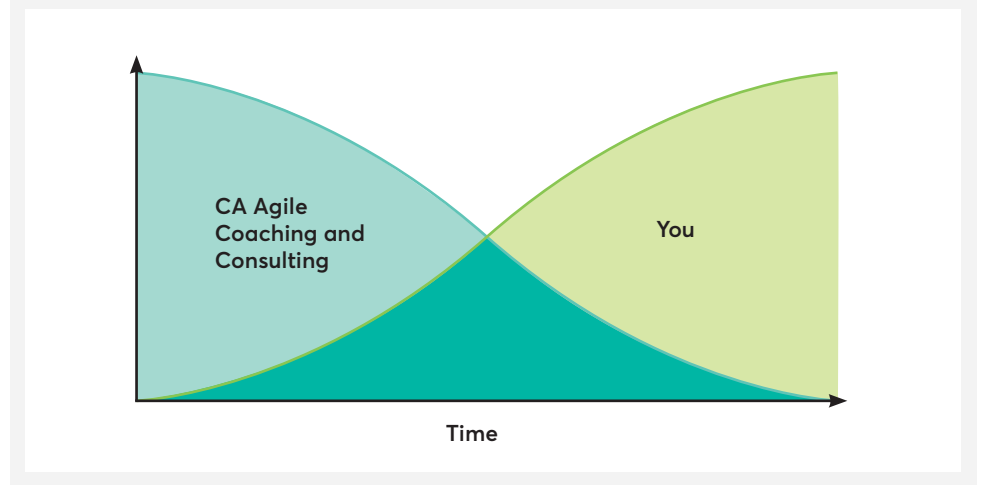

- Plan agile adoption for small groups
- Plan, guide and co-facilitate team, program and portfolio ceremonies
- Improve agile practices and collaboration for individuals, teams and programs
- Mentor team leaders in facilitation and servant leadership
- Configure CA Agile Central, and use the platform to make decisions and improvements
- Prepare for on-site agile ceremonies
- Coach on technical practices
- Develop custom training courses

Scale agile practices to the program level. When scaling coordinated teams in an agile program, coaching becomes even more important. After all, you're gathering potentially hundreds of people together to plan and deliver the software that serves your

customers and runs your business. Models like the Scaled Agile Framework® (SAFe) provide a starting point and experienced consultants make them work in the real world. A seasoned coach can help you make critical decisions quickly so that you avoid the failure patterns we've seen again and again in large enterprise agile adoptions. Even when you begin with a framework, there are many process and project decisions to make. Some have a better practice to adopt and some are best made by you, as an expert in your own business. A good coach will help you sort out those decisions with minimal risk.

Align strategy and execution. Is everyone building the right things? Your success and customer satisfaction depend on it. CA Agile Consultants help you design an agile portfolio management process supported by CA Agile Central. Together Agile Services and CA Agile Central will help your teams continuously track and prioritize work according to its value and ability to advance your strategy, reallocate development resources to maximize portfolio growth and align strategy and development to ensure releases deliver the most valuable features in your roadmap.

Shortest path to self-reliant agility.

Purpose-built to drive change and deliver customer value.

Couple agile coaching and consulting services with CA Agile Central, and put agile practices at the center of your business to build a fast, responsive and reliable delivery engine.
