

Specific Program Documentation

The CA software program(s) ("CA Software") listed below is provided under the following terms and conditions in addition to any other terms and conditions referenced on the Order Form entered into by you and the CA entity ("CA") through which you obtained the license of the CA Software. These terms shall, be effective from the effective date of the Order Form.

Program Name: CA eHealth® Performance Manager

Specified Operating Environment

The CA Software's specifications and specified operating environment information may be found in Documentation accompanying the CA Software, if available (e.g., a user manual, user guide, or readme.txt or notice.txt file).

Licensing Model

The CA Software is licensed by the number of Managed Network Devices specified in the Order Form (the "Authorized Use Limitation").

"Managed Network Device" means a virtual or physical network-connected device with less than 200 ports that is managed by the CA Software and uses an Internet Protocol ("IP") address, including but not limited to IP and hybrid telephony devices, routers, appliances, hubs, virtual or physical servers, and virtual or physical machines, but excluding endpoint devices such as IP telephones.

When the CA Software is used to manage multiple network-connected devices (physical and virtual), each such use of the CA Software shall be counted for the purposes of determining the Authorized Use Limitation. A "virtual" server or machine environment is created where Virtual Machine Technology (which applies to both client and server hardware) is used to enable multiple instances of an operating system(s) to run on a single computer simultaneously.

Third Party Information and Terms

The following list identifies various third-party components used with the CA Software you are licensing and sets out certain notices, attributions and/or terms that CA is required to provide to you by the third party licensors of those components, as described in greater detail therein for each such component. For more information, please see <https://support.ca.com/prodinfo/tpterms>.
