

CA Project & Portfolio Management Core Implementation Service

At A Glance

Speed and innovation are happening across organizations at a fierce and fast pace, and teams must plan, collaborate and execute without missing a beat. Now, 50 to 100 users can be up and running in less than four weeks with a CA Project & Portfolio Management (CA PPM) Core implementation.

Boost performance for managing resources, teams and projects using features in the latest release. It's ideal for managing individual programs, such as transformation initiatives, or for large project teams. Plus, it's designed for fast and easy expansion as needs change. A limited number of Get Started learning subscriptions are included, making it an ideal starter system for new users.

KEY OUTCOMES

- **Faster deployment delivers faster value** from better adoption, data and outcomes
- **Improved visibility and simplified reporting** help you make informed decisions
- **Improved evaluation and allocation** improves team planning and management
- **Build for current and future demands** by adding functionality and options as needs change

KEY SERVICES FEATURES

- **Affordable option for 50 to 100 users.** Ideal for smaller user groups, managing individual programs, or large project teams within larger organizations.
- **Expand with modules and sprints, 1-2-3 easy.** Reserve a set of sprints, decide on an outcome focus, then quickly deploy modules. Get just what you need into use faster, for better value.
- **Learning subscriptions included.** Get Started learning subscriptions are included for a limited number of users and roles. More users can be added with two tiers of subscription options.
- **Solution integration options.** Join CA PPM with CA Agile Central to bridge the gaps between agility and governance by using one of many available modules.
- **SaaS flexibility** for fastest path to go-live and usability. Minimal maintenance, easy expansion.

Offering Overview

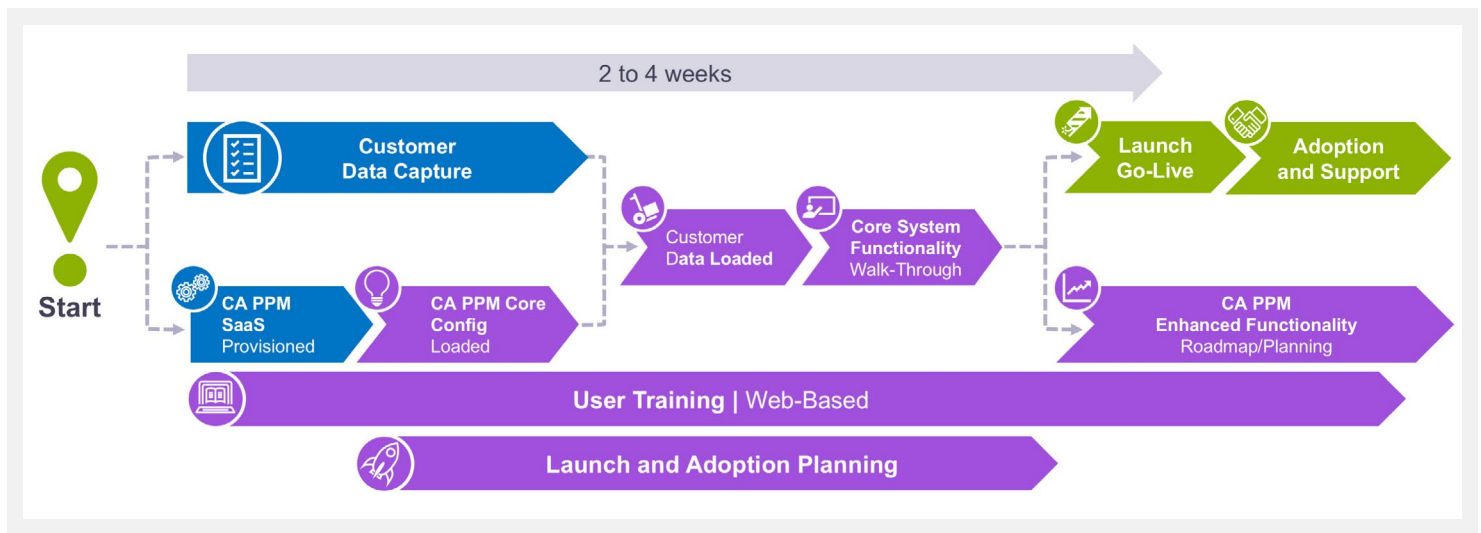

CA PPM Core is built on the same solid foundation as other CA PPM implementation options, but it concentrates on rapid turn-up of popular functionality in the new easy-to-use user interface. SaaS deployment, combined with streamlined templates for loading data, gets you ready to go within four weeks. When you're ready to grow, CA PPM Core is designed for flexibility by expanding capabilities through just-right sprints whenever you're ready.

- Deliver faster value through better adoption, data and outcomes
- Track project progress quickly and easily; enable teams to easily track contributions
- Improved visibility and simplified reporting help you make informed decisions
- Simple, collaborative resource management for quick and easy allocations
- Easily evaluate team capacity; anticipate role demand for better planning
- Seamless collaboration with project team for consistent tracking and decision points

Foundation Services

CA PPM Core is built on the same solid foundation as other CA PPM implementation options, but it concentrates on rapid turn-up for the most popular functionality. SaaS deployment, combined with streamlined templates for loading data, gets you ready to go within four weeks. It is an affordable option for 50 to 100 users—ideal for smaller user groups, managing individual programs, or large project teams within larger organizations. Get Started learning subscriptions are included for a limited number of users and key roles, to encourage building skills for confident use of CA PPM's powerful features.

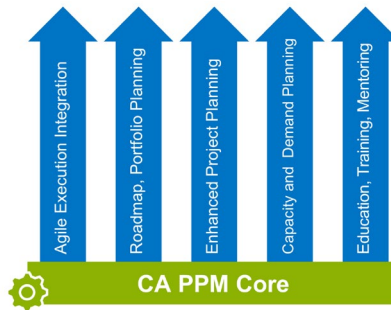

Because CA PPM Core is a SaaS deployment, it is also the fastest path to go-live and usability, with minimal maintenance and easy expansion. As your needs change, choose from a wide range of right-size modules designed to deploy in quick sprints for faster usability.

Acceleration Services

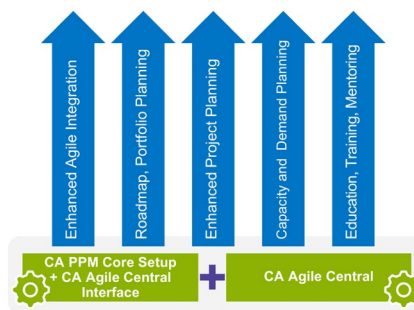

Expand With Modules and Sprints

Your CA PPM Core is a solid foundation on which you can build capability as needed. Reserve a set of sprints, decide on a business outcome focus as needs change, and then decide which modules to deploy when it's right for you. Capability categories are comprised of multiple smaller modules, each intentionally smaller in scope so you get just what you need for faster usability and better value.

CA PPM + CA Agile Central

When you need an integrated solution that connects business strategy to execution, including investment spending and ROI, CA PPM and CA Agile Central can help you bridge the gaps between agility and governance. Connect the work of agile teams to project and portfolio management for a single consolidated view. The CA PPM Core implementation gives you a quick start, and reserved sprints can then be used to deploy only the modules you need to build the combined solution.

About CA Services

Include CA Services as part of your strategy for better business outcomes. Leveraging our expertise and best practices, we'll work with you to align project goals to the outcomes of greatest value and priority to your organization and help you accelerate your business transformation through:

Organizational enablement: Enabling users and accelerating solution adoption to speed value realization.

Technology services: Implementing a flexible solution that delivers incremental value and that will grow and adapt to evolving business needs.

Success management: Assisting you with development and execution of a clear plan for long-term success.
