Tech Mahindra represents the connected world, offering innovative and customer-centric information technology services and solutions, enabling Enterprises, Associates and the Society to Rise®. We are a USD 2.7 billion company with 83,000 professionals across 49 countries, helping 540 global customers including Fortune 500 companies. Our Consulting, Enterprise and Telecom solutions, platforms and reusable assets connect across a number of technologies to derive tangible business value.

We are part of the USD 16.2 billion Mahindra Group that employs more than 155,000 people in over 100 countries. The Group operates in the key industries that drive economic growth, enjoying a leadership position in tractors, utility vehicles, information technology and vacation ownership.

Our Consulting Practice has helped clients achieve breakthrough improvement in business processes, build high performance business operations, make smart investments in Information and Communications Technology assets and enhance business value of ICT investments that are in line with the strategic objectives of the enterprise. Our approach has improved business operations and the overall IT function for some of key customers.

Connected World.
Connected Solutions.

A holistic release management solution

Application release automation is a holistic solution covering design, development and maintenance of application workflows.

- Benefits:**
- Decreasing downtime eliminating failures in production by 80%
 - Shortening application release time up to 90%
 - reducing the time and cost of managing applications up to 75%
 - Ensuring application service reporting and compliance while reducing audit cycles by 90%.
 - Improved manageability, audit tracking and compliance
 - Reduced release errors and cost
 - Increased release capacity

Our solution addresses Release Automation along with complete DevOps Strategy addressing the complete DevOps value chain

The Tech Mahindra Advantage

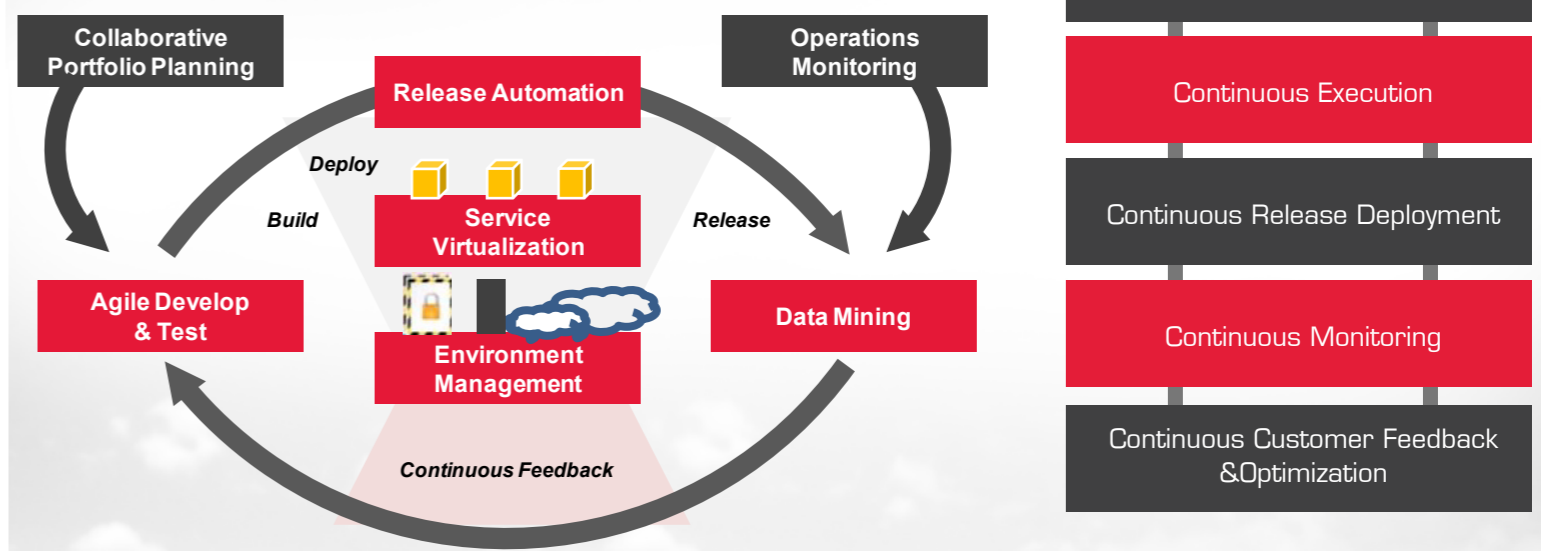

- Dedicated Centre of Excellence
- Committed & Rapid Return on Investment
- Invested Business Value Assessment & Proof of Concept
- Requirement based Engagement models – CAPEX, OPEX, Hosted (Pay per Use)
- Quick integration with Service Virtualized environment
- Extensive experience with 3rd party tools for Continuous delivery and integration
- Joint Collaboration in Solution & Service Delivery

The Release Conundrum

As agile development becomes more the norm, release management has remained a major bottleneck, delaying key application deployments at a time when businesses highly rely on software for competitive differentiations and service innovation.

To keep pace with Application development and Releases, companies are adapting to model based scalable and reusable application release automation workflows as against the empirical manual approaches that are traditionally highly dependent on human efforts and globally dispersed team coordination.

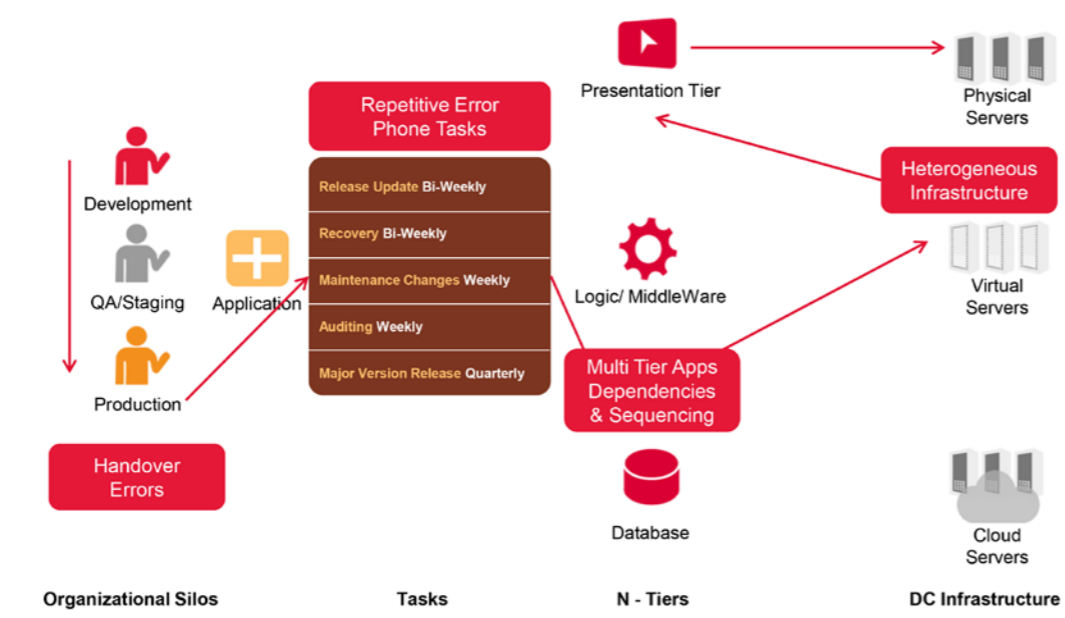

Our solution not just addresses Release Automation but will bring the complete DevOps Strategy and address the complete value chain of DevOps

The lesser known facts

- Application release times can be accelerated from days to minutes.
- Up to 60% of application downtime is caused by mis-configurations and application service errors, with the average cost of a single hour of downtime estimated at \$45,000 for mid-sized organizations.
- Up to 75% of time of operations team is spent on managing applications with costs growing at up to 20% annually.
- Over 90% of application releases are late.

Application Complexities
