

September 20, 2016

To Our Valued Customers,

CA Technologies today [announced](#) it has signed a definitive agreement to acquire BlazeMeter. The acquisition is recognition of the transformative shift that is taking place to democratize application testing as organizations accelerate their DevOps journey to drive speed and quality in the delivery of new software updates and innovations.

The addition of BlazeMeter is a natural extension of CA Technologies leading DevOps solutions. BlazeMeter seamlessly integrates with CA's continuous delivery solutions to further improve testing efficiency and accelerate the deployment of high quality applications. CA solutions that help implement continuous delivery include: [CA Service Virtualization](#), [CA Release Automation](#), [CA Application Test](#), [CA Test Data Manager](#) and [CA Agile Requirements Designer](#). For additional information, please visit [ca.com](#).

CA Technologies and BlazeMeter share a common vision for the future of open source-based continuous performance testing, and we are excited about the opportunity we bring as one company. We look forward to continuing our relationship and helping you to implement continuous delivery as part of your digital transformation initiatives.

If you have any questions, please feel free to reach out to your existing BlazeMeter contacts.

Sincerely,

Alon Girmonsky
CEO
BlazeMeter

Jeff Scheaffer
