Exam Questions

Exam Information

The CA Technologies Certification Program is designed to measure your skills, knowledge, and expertise in managing, administering, installing, configuring and implementing select CA Technologies products for complete and optimized IT solutions. With CA certifications, management teams will have peace of mind that knowledgeable professionals are handling their CA Technologies applications.

Proctored by a third party vendor, KryterionOnline, CA Technologies certifications objectively validate the competencies of a project team – whether that team is your in-house staff, CA Technologies Professional Services, or a CA Technologies partner.

The aim of this document is to help you prepare for CA IdentityMinder r12.x Implementation Proven Professional Certification Exam. Make sure that you familiarize yourself with the content areas tested. Your best path to success is to attend the exam prep course(s).

You may also find it helpful to review the product documentation at <https://support.ca.com> and to participate in CA Global User Community forums at <https://communities.ca.com>.

The experience gained from taking courses and using the product will help you:

- Gain a comprehensive understanding of the product or solution
- Increase the likelihood of passing the exam on your first attempt

The Exam Experience	Professional Exam Details
<p>You can register to take an online proctored exam from your home or office using Kryterion’s Online Proctoring (OLP) Services, or you can take an on-site proctored exam at a Kryterion testing center. If you choose to take an online proctored exam, you will need Internet access, an external web camera, and a computer that meets specific hardware and software requirements.</p> <p>For answers to frequently asked questions about registering for exams, locations, on-site and virtual proctoring, OLP equipment requirements, cancellation and re-scheduling policies and more, read our FAQs at http://www.ca.com/us/education/accreditations/certifications/certification-faq.aspx.</p> <p>CA employees may also go here for more information: https://one.ca.com/education/certification</p>	<ul style="list-style-type: none">▪ Product release: Major release listed in the title; Includes subsequent point releases▪ Recertification: There is no annual requirement to recertify for the same release of a product. For each major product release, an updated exam will be available for recertification.▪ Number of items = 50▪ Item types = Multiple choice, including multiple response questions▪ Time to complete test: 90 minutes▪ Passing score is 70%▪ Attempts Permitted: You may register for your first retake immediately. For subsequent retakes you are required to wait at least thirty (30) calendar days from the date of your last attempt. Read the online FAQs for details.

Exam Questions

Exam Security

Only qualified candidates who demonstrate competency by successfully passing the CA Technologies certification exam will be awarded certification credentials. Prospective certification candidates are encouraged to prepare for the exam using the Exam Study Guide and other materials available on the Certification from CA Technologies [website](#).

To safeguard the integrity of the certification program, CA Technologies requires all candidates to behave in an ethical manner and to comply with the rules of the third-party test center for on-site proctoring and on-line proctoring. The validity of the certification program depends on the exam content remaining secure and undisclosed to other potential certification candidates. CA Technologies will not tolerate cheating, fraud, or misconduct, which includes but is not limited to the following:

- Obtaining, whether through purchase or otherwise acquiring, unauthorized exam preparation materials from any non-CA website
- Obtaining, whether through purchase or otherwise acquiring, unauthorized exam questions from any non-CA website, including brain dump websites
- Acquiring or attempting to acquire exam questions through online communities, chat rooms, screen capture software, forums, and social networking sites
- Acquiring or attempting to acquire exam content through CA Subject Matter Experts, CA Support Staff, or CA Certified Professionals
- Using or attempting to use a proxy to sit for the exam in your place
- Taking or attempting to take an exam for someone else
- Receiving or giving assistance during an exam
- Sharing exam questions or answers with a potential certification candidate
- Violating testing center rules
- Falsifying a diploma or score report
- Using a CA Technologies certification logo or credential to which you are not entitled

CA Technologies reserves the right to take any actions it deems reasonably appropriate in the case of suspected misconduct or violation of the terms of the Non-Disclosure Agreement, including, but not limited to, cancelling an exam result, revoking exam or certification status, terminating use of the Designation, requiring a candidate to retake an exam, banning a candidate from the certification program, and reporting misconduct to the candidate's employer. CA Technologies considers cheating a serious offense that warrants disciplinary action, up to and including termination of employment.

Exam Questions

Sample Certification Exam Questions

These sample questions are very similar to the questions in the actual exam. Some questions may include several correct options.

Questions	Options
Question 1 Which component of CA IdentityMinder enables you to accelerate integration by generating custom connectors without the need for programming skills?	A. SuperAgent B. Connector Xpress C. Smart Connection D. Integration Xpress
Question 2 When you configure CA IdentityMinder provisioning properties, you need to specify:	A. a base URL. B. a public alias. C. a role definitions file. D. an inbound administrator.
Question 3 You are installing the Report Server on a Windows 2008 32-bit system. You have run the registry script and now you are about to copy the JDBC JAR files from the CA IdentityMinder media. To specify the location of the JAR files, which file will you need to edit?	A. ra.xml B. server.xml C. CRConfig.xml D. reportparameters.xml
Question 4 Which statement about the CA IdentityMinder environment is TRUE?	A. Each User Store must be associated with a single CA IdentityMinder environment. B. With multiple CA IdentityMinder environments, you can manage objects with different LDAP object classes. C. To define different views of a directory, each CA IdentityMinder environment can be identified with multiple User Stores. D. The User Console enables users to create and maintain their own accounts for accessing resources, such as a customer website.
Question 5 Which CA IdentityMinder utility is used for creating dynamic endpoints?	A. Snoop B. etauil C. Connector Xpress D. Host to Caft Definition
Question 6 How is the group class member mapped for Java Naming and Directory Interface (JNDI)?	A. CN B. DN C. OU D. OU and CN

Exam Questions

Questions	Options
Question 7 Which statement about configuring Secure Sockets Layer (SSL) for Active Directory is TRUE?	<ul style="list-style-type: none">A. SSL communication is mandatory when using the Active Directory Services (ADS) Connector.B. The High Encryption Pack should be installed on the CA IdentityMinder Server and Provisioning Server only.C. SSL communication is necessary if you want to use the password management features of the ADS Connector.D. If the Java Connector Server (JCS) and ADS are installed on a single machine, the Certificate Authority (CA) must be installed on that machine.
Question 8 What is the purpose of the test_sync tool?	<ul style="list-style-type: none">A. Tests scope rules for inbound synchronizationB. Tests the synchronization of global users with their rolesC. Verifies the synchronization of global user accounts with their CA account templatesD. Verifies that the password update of a local account is effectively propagated by the Provisioning Server
Question 9 Which statement about the batch utility (etautil) is TRUE?	<ul style="list-style-type: none">A. It is currently supported on UNIX systems only.B. It enables you to manage objects in the Provisioning Directory.C. It is the quickest way to execute identity policies against the users you import to the User Store.D. Because it has a command line interface, it performs directory exploration and correlation on large user populations using minimal resources.
Question 10 You need to collect and package diagnostic details about CA IdentityMinder and CA Directory Server for CA Technologies Support. Which utilities can you use for this purpose? (Choose two)	<ul style="list-style-type: none">A. iminfo.batB. dxinfo.exeC. IMtrans.exeD. cadir_logs.bat
Question 11 For debugging Connector Xpress problems, developers should start with:	<ul style="list-style-type: none">A. SA Translogs.B. ETATrans logs.C. JCS_daily * files.D. JCS_conn_connector names.* logs.
Question 12 In which CA IdentityMinder directory structure are users and groups stored at the root, as defined in the user directory, or in a container one level below the root?	<ul style="list-style-type: none">A. FlatB. CorporateC. HierarchicalD. No Organization
