

Exam Study Guide

**Exam 250 612:
Rally Technical Specialist**

1. About Broadcom Certification Exams

Broadcom Certification demonstrates the highest levels of technical competency, productivity, and industry recognition with increased opportunities for career advancement.

Validate your technical knowledge and competency by becoming Broadcom Certified based on your specific area of Broadcom Software technology expertise. To achieve this level of certification, candidates must pass one proctored certification exam based on a combination of training material, commonly referenced product documentation, and real-world job scenarios.

Each certification exam is a computer-based examination that gives you the opportunity to demonstrate your mastery of critical skills sets against published exam objectives. Qualified proctors through independent test centers, on Broadcom's behalf, administer the certification exams. Each exam has a predefined time allowed. Please confirm timing allotted when registering for your exam. All exams are closed book, which means you may not have any printed material, computers, or calculators with you during the exam. Upon completion of your exam, you will receive immediate, provisional, on-screen feedback on your scoring.

For more detailed information about Broadcom Technical Specialist Exams and other Broadcom Partner certifications, please visit the Broadcom Certification Program page at <https://www.broadcom.com/support/education/symantec/certification>.

2. Preparing for Your Certification Exam

Register as a Partner User and Activate Your LMS Account

In order to access and consume the documentation and training materials needed to prepare for your Certification Exam, you will first need to register in Broadcom's systems as a Partner User, and then activate your Learning Management System account.

Detailed instructions for Partner User registration and activation can be found [here](#).

Recommended Experience

To supplement the education and training materials provided to prepare for this exam, it is recommended that the candidate has at least 3-6 months experience working with Rally in a production or lab environment.

Exam Description

Candidates can validate technical knowledge and competency by becoming Broadcom Technical Specialist based on their specific area of technical expertise. To achieve this level of certification, candidates must pass this proctored exam based on a combination of training material, commonly referenced product documentation, and real-world job scenarios.

This exam targets IT Professionals using Rally. This certification exam tests the candidate's knowledge of how to install, configure and administer Rally.

3. Recommended Study Materials

Study References & Recommended Courses

The experience gained from taking courses, using the product, and reading the documentation will help you:

- Gain a comprehensive understanding of the product or solution
- Increase the likelihood of passing the exam on your first attempt

Self-paced computer-based courses:
