

The Blue Coat Network Security Consultant provides a unique set of capabilities that encompass a broad knowledge of networking, data center technologies and security architectures. This combination of expertise helps bridge the gap in many organizations to create solutions that meet the demands of dynamic and ever-changing needs of today's IT organizations. With our experience dealing with global enterprises and service providers, we are ready to help in the most complex situations and become a valued member of your team, either on a short term multi-month engagement or longer term with an annual contract.

Knowledge You Can Count On

The value of a Blue Coat Network Security Consultant cannot be overstated; a single resource spanning multiple knowledge domains enable you to accelerate your network and security initiatives. The Blue Coat Network Security Consultant integrates with your staff and serves as a direct resource for all aspects of your Blue Coat solution and network security environment. As a trusted advisor, deliver ongoing knowledge transfer and offer regular insights and recommendations on a proactive basis – while ensuring alignment with your technical and business critical strategies.

Blue Coat Network Security Consultants enable successful large scale initiatives and programs which cross multiple boundaries - network security, engineering, and operations.

- Architecture and design reviews
- Gap analysis & optimization
- Migration and upgrade strategy & plans
- Operational improvement plans

Why a Blue Coat Network Security Consultant?

Take advantage of the proven skills and experience our consultants have acquired working with hundreds of clients in complex network security environments in both service provider and enterprise segments.

The value of the Network Security Consultant reflects their long standing experience in the successful planning, designing, and implementation of high availability network-centric solutions. Coupled with their open platform expertise and multi-vendor application knowledge, it's an unbeatable combination of skills to accelerate the successful evolution of your network security infrastructure.

Network Security Consultant

Network Security Consultants are uniquely positioned to address all facets of architecture, analysis, design and implementation from both a strategic and tactical perspective.

Highly specialized expertise spanning both network and security enables a shorter time-to-solution for highly available Network Security infrastructure solutions.
