

Oracle ODSEE to CA Directory Migration Services

At A Glance

Your directory is the backbone of your identity and access management infrastructure. You count on it to support the most demanding, mission-critical applications and online services flawlessly to ensure exceptional customer satisfaction. Legacy directories are falling behind and struggle to deliver the performance and scale you require in the application economy. CA Directory migration services deliver a phased, low-risk approach to help you move off a soon-to-be-unsupported directory to a proven, high performance, secure platform with agility and value.

KEY OUTCOMES

- **Reduced risk with expert deployment** that delivers high performing, scalable and secure directory
- **Lower migration cost** with flexible implementation model
- **Reduced total cost of ownership** by facilitating automated operations across distributed deployments and a modern next-gen management console
- **Eliminate disruption** to existing enterprise applications for business continuity
- **Helps ensure long-term support** with a next-gen directory platform

KEY SERVICES FEATURES

- **Provides bidirectional synchronization** between Oracle ODSEE and CA Directory to assist the migration process
- **Eliminates support concerns** for critical security infrastructure with a modern directory platform
- **Improved ROI** with a focus on solution adoption throughout the migration process
- **Improved user experience** with a highly available directory solution
- **Flexible service** that can accommodate a variety of ODSEE environment sizes.

Business Challenges

The ability to deliver superior availability, reliability, scalability and performance for your most demanding applications directly depends on the underlying directory infrastructure. With the announced end of life of Oracle Directory Server Enterprise Edition, you face a decision point. You may have concerns, including:

- **Should I upgrade** to the Oracle replacement option or consider an alternative more suited to my requirements?
- **Do my current vendor's choices meet my needs** of massive scalability, reliability, security and performance?
- **Am I introducing more risk** to the business the longer I delay my decision to migrate off ODSEE??

Offering Overview

Oracle ODSEE to CA Directory Migration Services provide the needed assistance to move from a legacy directory environment to a battle-proven, ultra-high performing and massively scalable modern directory to support your mission-critical security infrastructure. The CA Services professionals deliver a phased approach to move applications over to CA Directory with minimal disruption to your enterprise. The modular migration model lets you make the move in a logical and low-risk manner to ensure continuity of operations and provides for faster adoption of the solution across the business.

Foundation Services

Achieve desired business outcomes by unleashing powerful and comprehensive capabilities with CA Directory foundation services. The CA Services Directory implementation model helps ensure you can deliver value to the business in as little as two weeks, while building on a solid backbone with a next-gen directory solution. CA Directory Foundation Services delivers:

- Deployment of a highly available CA Directory
- Migration of ODSEE content to CA Directory
- Phased approach for reduced risk
- Flexible implementation for small to medium ODSEE environments

Acceleration Services

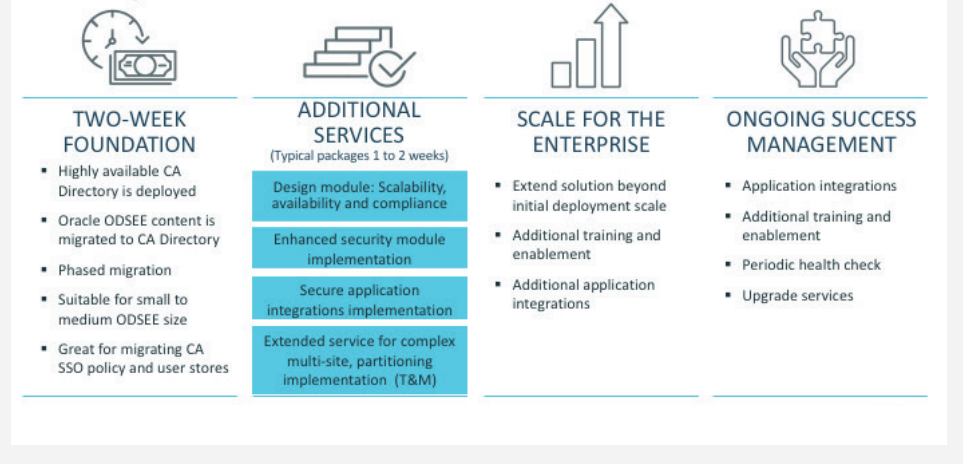

With acceleration services for CA Directory you can extend the value of the solution by adding functionality to your foundation implementation in 1- to 2-week increments.

- **Solution Design Acceleration Services** provides for a tailored solution design to accommodate requirements for scalability, availability and compliance
- **Enhanced Security Acceleration Services** implement security for communications, compliance and access control
- **Secure Application Integration Acceleration Services** implements detailed integration of applications to meet specific schema, access and operations requirements
- **Extended Service for Complex Multi-Site and Partitioning Implementation**
