

STRONG AUTHENTICATION ... NO PASSWORDS

The Passwordless Cloud

PASSWORDS ... We've had them for years, we know they're not secure, and strong passwords are hard to remember.

most popular passwords

123456

password

Logmein

And with all the new cloud apps we now use, the number of passwords has multiplied... and the number of breaches is growing

Two-Factor Authentication (2FA) provides the protection we need

80% breaches could be eliminated by **2FA**

HOW 2FA WORKS

HOW IT WORKS

To sign in to an online application, partner site, or through the Symantec VIP Access Manager SSO portal – you just need a username and your fingerprint.

ITS 2FA SECURE, AND EASY AS A FINGERPRINT.
