

Supercharge CA Operational Intelligence Maximize the Value of your IT Ops Data

Fast, Easy Automated Integrations

CA's Operational Intelligence (CA OI), part of CA's AIOps platform, helps users make smarter, faster decisions. Machine learning-driven analytics and out-of-the-box visualization and correlation, help CA's customers to increase system availability and drive down the cost, complexity, and time required to restore availability—but maximum value is directly related to the breadth and depth of integrated operations data.

StreamWeaver efficiently feeds metrics and events data from third-party tools into CA OI (and other destinations), resulting in significant improvements in your ability to resolve issues—before they become service impacting

Keep that data stream flowing with our **fault-tolerant, high-throughput, continuously available, horizontally scalable** enterprise architecture while avoiding the costs of building, and maintaining, brittle integrations.

in just 3 minutes
GET A DEMO

INTEGRATE CA OPERATIONAL INTELLIGENCE SUITE WITH THIRD-PARTY OPS TOOLS

In Just 3 Minutes

StreamWeaver liberates your full stack operations data. With StreamWeaver, you can weave source data streams into CA OI or another destination, straight out-of-the-box. We can show you the start-to-finish integration in just 3 minutes.

Click-and-connect capabilities make this integration quick and easy and without need for costly application developers or consulting expertise. You can measure the time to integrate in minutes. The tools and applications below represent the current, out-of-the-box streaming mediators paired with CA IO. If you don't see something you need, let us know. We are continually adding sources and destinations and may already be working on it.
