Symantec Endpoint Protection 14
has

Defending your business against unknown threats, targeted attacks, and zero-day vulnerabilities is critical. You need to have complete protection. But that shouldn't get in the way of everyday work.

Symantec's solution provides the strongest protection in a single agent, reducing complexity while delivering high-performance and orchestrated response.

1

PROTECTION

Best Enterprise Protection 2 Years in a Row

Multi-layered protection combines artificial intelligence powered by advanced machine learning, exploit prevention, and essential technologies to deliver the strongest protection across the attack chain.

Exploit Prevention Test Results

2

PERFORMANCE

Highest Score in Overall Performance

Performance was assessed using 17 different tests to see how each solution impacted everyday tasks such as starting up, launching a program and using a network connection. The higher the points, the better.

RESPONSE

Powerful Response Capabilities

Symantec Endpoint Protection delivers powerful response capabilities and integration with network security for orchestrated response to quickly stop threats and the spread of infection.

Endpoint Detection and Response (EDR) allows you to detect breaches using machine learning and behavioral analysis, investigate suspicious events, and remediate complex attacks across all endpoints from one place.

...WITH A SINGLE AGENT

The lightweight single agent merges multiple next-gen technologies and lowers total cost of ownership.

Symantec offers complete endpoint protection so you can focus on your business, not threats.

The clear choice is Symantec
