

VMware Certified Technical Associate (VCTA)

Q. What is the VCTA?

A. The VMware Certified Technical Associate (VCTA) is a credential offered by VMware by Broadcom that validates the skills and knowledge required by candidates performing operational tasks within a virtualized infrastructure, in areas across multi-cloud operations, networking, security, and device management. The training provides hands-on practice and learning for both new and experienced technical students.

Q. Who should earn the VCTA?

A. The VCTA is for anyone new to the industry, whether as a newly graduating student, someone changing careers, or someone working in the industry and looking for opportunities to advance. The VCTA is built for those performing an operator job role, consisting of Day 2 types of regular, repeated tasks typically delegated by administrators of virtualized environments.

Q. What is the best way to prepare for the VCTA exam?

A. Prepare for the exam by taking the available training aligned to the same objectives as the exam. This training is online and can be accessed through the [Broadcom Learning platform](#).

Q. How do I take the VCTA exam?

A. You can take the exam at either a Pearson VUE test center or at a home, office, or work location using the Pearson OnVUE remote proctored solution. When registering for the exam, you will have the option of selecting your location to take the exam.

Q. Is the VCTA exam proctored or non-proctored?

A. The VCTA exam is a proctored exam. This means that as you take the exam, there will be a proctor monitoring the exam, to protect both the integrity of the exam as well as validate that the candidate is answering the questions on their own and not leveraging outside help or resources.

Q. How long is the VCTA?

A. The VCTA consists of a 60 to 90-minute multiple-choice exam.

Q. Is the VCTA a prerequisite for the VCP?

A. No. The VMware Certified Professional (VCP) exams are for a more advanced, higher-level of certification, aligned to an administrator job role. Experienced candidates may earn the VCP without first earning the VCTA.

Q. What tracks or domains does the VCTA cover?

A. There is a unique VCTA for each track that the VMware by Broadcom certification program covers.

- Data Center Virtualization - VCTA-DCV
- Network Virtualization - VCTA-NV
- Security - VCTA-SEC
- Cloud Management and Automation - VCTA-CMA
- End-User Computing - VCTA-EUC
- Application Modernization - VCTA-AM
