Symantec Technology Partner: Votiro

VOTIRO
S E C U R E D.

Partner Product: Disarmer for Web

Symantec Products: Symantec Web Isolation

Business Challenge

Cyber attacks most commonly breach security through malicious links, file downloads, and email attachments. As ever-more innovative threats emerge, detection, filtering, sandboxing, and other technologies simply aren't effective enough.

Adding to the complexity, malware now favors the web browser as the ultimate attack vector because it executes code from third-party websites directly to your endpoint. Security teams, tasked with defending against millions of sites not categorized by web gateways, overcompensate, blocking legitimate sites and hindering workflow.

Combined Benefits

- Safely use the web without fear of attack.
- Download files with confidence they're safe.
- Enjoy a transparent and seamless web experience.
- Drive better performance with the most efficient workflow.
- Rely on the proven, patented protection of award-winning content disarm and reconstruction (CDR) technology from a Gartner Cool Vendor.
- Operate without additional burdens: No endpoint agent, and support for all browsers, operating systems, and devices.
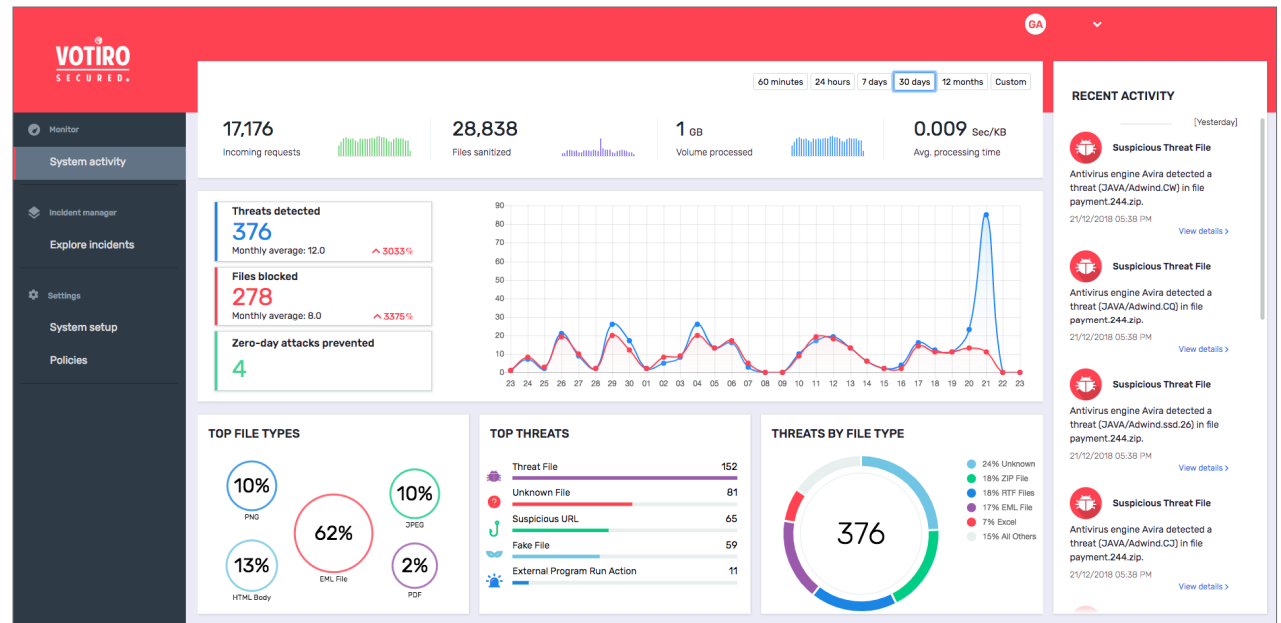

Integrated Solution

Symantec Web Isolation combines with Votiro Disarmer for Web in a unique, extremely effective solution. It isolates malware and other threats so they can't harm the network and user devices. At the same time, it scans and neutralizes any exploits in files downloaded from the web, ensuring they are safe to open—all while supporting an uncompromised internet user experience.

Votiro Content Disarm and Reconstruction Technology

Votiro's patented, signatureless CDR technology targets the file formats most commonly exploited via spear phishing and other advanced persistent threats.

Votiro Disarmer for Web neutralizes exploit attempts prior to their discovery, before other security systems can protect against them. It cleanses files and makes them available for safe use in under a second, a process that's completely invisible to users. The result is undiminished workflow with full file functionality and minimal latency.

✓ **Symantec.™**

Votiro Disarmer for Web allows you to communicate, collaborate, and perform safely, without disrupting your workflow.

About Votiro

Votiro is an award-winning cybersecurity company with a mission of securing organizations throughout their digital transformation journey. Our proprietary next-generation CDR technology allows users to safely open email attachments, download and transfer files, share content, and use removable media, while keeping performance and functionality intact. With over 400 customers globally, Votiro has offices in US, Singapore, Australia, and Israel. Votiro is a Gartner Cool Vendor award winner and certified by the international standard of Common Criteria for Information Technology Security Evaluation (ISO/IEC 15408).

About Symantec

Symantec Corporation (NASDAQ: SYMC), the world's leading cyber security company, helps organizations, governments and people secure their most important data wherever it lives. Organizations across the world look to Symantec for strategic, integrated solutions to defend against sophisticated attacks across endpoints, cloud and infrastructure. Likewise, a global community of more than 50 million people and families rely on Symantec's Norton and LifeLock product suites to protect their digital lives at home and across their devices. Symantec operates one of the world's largest civilian cyber intelligence networks, allowing it to see and protect against the most advanced threats.
